IT SUPPORT/SERVICE DESK

PROFESSIONAL SUMMARY

Motivated Information Technology graduate seeking an entry-level IT Support or Service Desk position. Knowledgeable in basic hardware, software, networking, and troubleshooting. Strong communication and problem-solving skills with a willingness to learn and provide reliable technical support.

WORK EXPERIENCE

Technical Support Intern / OJT | JANUARY 2026 – APRIL 2026

- Diagnosed and resolved hardware, software, network, and system-related issues by applying systematic troubleshooting procedures, restoring functionality and minimizing user downtime.
- Assisted users with technical concerns through phone, chat, email, and in-person support, providing clear solutions that improved user productivity and reduced recurring issues.
- Troubleshot hardware and software problems by identifying root causes and implementing appropriate solutions, ensuring reliable system performance and minimizing service interruptions.
- Documented user concerns, troubleshooting steps, and resolutions in support records, improving issue tracking and enabling more efficient follow-up.

PROJECTS

CAPSTONE/ THESIS PROJECT

A Web-Based Integrated Business Management System for Intellitech System

- Designed and developed a centralized web-based business management system integrating appointment scheduling, POS, inventory, payroll, attendance, and customer services, streamlining business operations and reducing manual administrative processes.
- Designed user interfaces and system workflows for multiple business functions, including appointment booking, inventory management, payroll, attendance tracking, and POS, creating a user-friendly and efficient platform for daily operations.
- Tested and troubleshot system modules by identifying functional errors, validating workflows, and resolving technical issues, improving system reliability, functionality, and overall user experience.

PC SETUP & NETWORKING PROJECT

Academic Project

- Assembled and configured desktop computers by installing hardware components and setting up operating systems, ensuring functional and ready-to-use workstations.
- Crimped and terminated Ethernet cables using RJ45 connectors following proper wiring standards, creating reliable network connections between devices.
- Tested and troubleshot PC hardware and network connectivity issues, ensuring proper device and network functionality.
